

Providing Better Water For Better Living.

U.V. Monitor

U.V. dosage metering device. This optional true U.V. Monitor reads only the 254-nm intensity output of the ultraviolet light within the U.V. treatment chamber.

Benefits

- Meters true U.V. intensity*
- Visual digital intensity reading*
- Audible alarm at 70% intensity*
- At 70% intensity output is equal to 40,000 $\mu\text{/cm}^2$*
- Optional fail safe solenoid outlet*
- Solid state electronics*
- 110V*

Solenoid

Solenoid- *Optional fail safe shut-off valve. (To be used with U.V. Monitor System)*

Benefits

- 1 inch port plastic control valve*
- Designed to allow maximum water flow over a wide range of pressure*
- Diaphragm allows smooth closing to prevent water hammer*
- Normally closed*
